

Chemistry

Objectives:

The purpose of Chemistry is to provide opportunities for students to appreciate that we are living in a world of chemicals and that chemistry is a highly relevant and important area of learning. The subject enables students to investigate the possible methods to isolate useful materials in our environment and to analyse them. Having studied Chemistry, students are expected to have a better understanding of various scientific investigation and chemistry concepts.

Members:

Mr. YL Tsang (Panel Head)

Mr. TY Chan
