

English Language

Objectives:

The English Language curriculum aims to equip students with a high level of English proficiency to understand and to apply the language in a confident manner. By kindling in them a regular reading habit, encouraging them to use English for daily communication and motivating them to take part in many different forms of activities, the English team provides students with strong support on reading, writing, listening and speaking. Currently, the contextualised grammar approach is adopted to strengthen students' linguistic competence and to enhance their vocabulary building. The panel is also working towards the direction to introduce projects driven by students' interests so as to maximize their opportunities to read more authentic texts using English.

Different programmes are organised under English Panel to enliven the English learning atmosphere. We have different student bodies to promote English learning, i.e. English Debate Team, Advanced English Writing Group, English Ambassadors and English Society.
