

Mathematics

Objectives:

1. To develop a capacity to conceptualize, inquire, reason and communicate mathematically.
2. To develop a capacity to use mathematics to formulate and solve problems in daily life as well as in mathematical contexts.
3. To foster a positive attitude towards mathematics and the appreciation of the aesthetic nature and cultural aspect of Mathematics.
4. To prepare students to cope confidently with mathematics needed in their future studies, workplace or daily life in a technological and information-rich society.
